OTHER SERVICES

MIGRATION TO GOOGLE CLOUD

We help organizations modernize their technology infrastructure by migrating applications, services and databases to Google Cloud Platform. Our approach ensures a secure, scalable transition following best practices in architecture, availability and cost optimization.

DEVELOPMENT ON ODOO

We extend Odoo's capabilities by building custom modules, process automation, specialized reports and integrations with third-party applications. We create solutions that fit each company's specific processes while keeping the platform stable and scalable.

FUNCTIONAL AND TECHNICAL SUPPORT FOR ODOO

We provide ongoing support to keep the Odoo platform running properly. Our service includes incident handling, evolutionary maintenance, functional improvements, performance optimization and continuous advice to ensure business continuity.

OTHER SERVICES

DATA MIGRATION

We migrate information from legacy systems, Excel files or other ERPs to Odoo or other business platforms. We ensure data integrity, consistency and quality through validation, standardization and controlled loading processes.

PROCESS AND ACCOUNTING CONSULTING

We help companies optimize their administrative, financial and operational processes by analyzing their business model and adopting best practices. Our approach aligns technology with the organization's strategic goals to increase efficiency and control over operations.

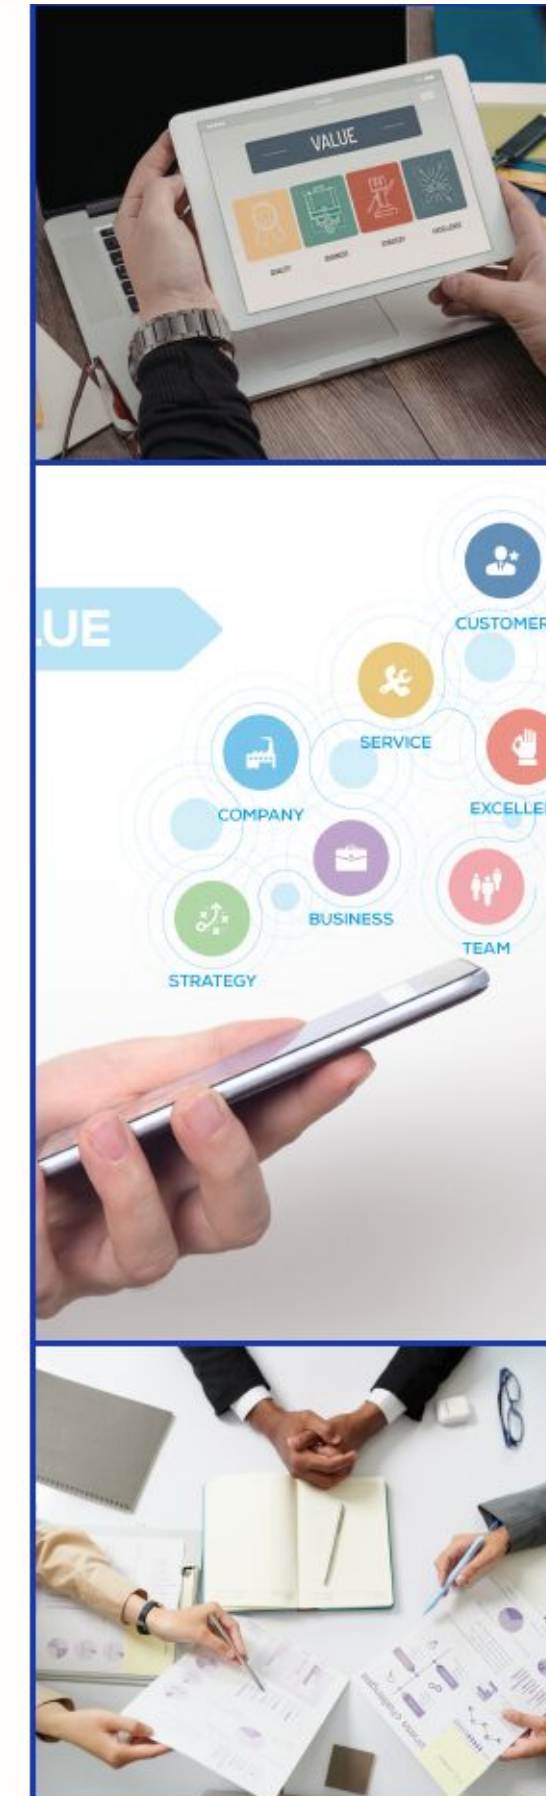

CYBERSECURITY CONSULTING

We assess organizations' technology security posture and implement strategies to protect information, reduce risks and strengthen business continuity. Our services cover vulnerability assessment, access management, security policies, data backup and secure architecture recommendations.

VALUE PROPOSITION

- Knowledge: deep expertise in technology and business processes
- Experience: a proven track record of successful implementations
- Responsibility: commitment to our clients' success
- Quality: high standards in every project
- Support: ongoing guidance during and after implementation
